

COMMUNITY MAUSOLEUM

To Be Built In the Ogden City Cemetery By Prominent Ogden Citizens, Will Bring Ogden Up to the Advanced Cities In the Nation.

A number of our progressive citizens have acquired the rights in Utah and Idaho to erect mausoleums for the overhead burial of the dead. There are at the present time about one hundred and thirty buildings devoted to this purpose in the United States, all constructed under the patent rights of the International Mausoleum Company of Chicago, which patent covers the general type of construction and a particularly effective system of sanitation. There are perhaps as many more under construction at the present time.

People's views vary on this question of burial; to some any discussion of the subject is distasteful and they avoid all and any consideration of it until they are brought face to face with the absolute demand for immediate action; then the chances are that they act without any thought of the cost involved. Others consider the preparation for such things as important and they realize that the time to attend to them is when they have time and opportunity to do the best thing. Others are superstitiously afraid that preparation for death may, in some way bring it about (this class is very rare and getting more so); still others, especially those who have lost dear ones, do all in their power that may seem a loving and respectful service to the memory of the departed ones. This subject has had so little attention that to many the words mausoleum and crypt don't mean anything. For those we will briefly explain:

A mausoleum is a building such as is shown in the above illustration, built of reinforced concrete, marble, stone and bronze. The inside walls are finished in white marble, the outside of stone and the doors of bronze. The building will be absolutely fireproof and as nearly permanent and everlasting as the best architects and contractors can make it. Cathedral glass will be used in all windows, thus giving the rooms and corridors a soft and mellow light. In the center of the building is a large hall or chapel well lighted and ventilated, on each side of the hall or chapel a corridor twelve feet wide extends the full length of the building, on either side of which are the apartments or crypts, each being sanitary and ventilated. The modern mausoleum marks the only step that has ever been taken by civilized people to make the care of the dead superior in any way to the customs of the uncivilized nations and tribes; in fact, the burials of our dead in the damp, unventilated ground is less sanitary than the methods of some of the people whom we are accustomed to consider savages. In many of the places where mausoleums have been built the apartments have been readily sold to persons who wished to transfer the remains of their loved ones from the unsatisfactory grave to those well ventilated and cleanly buildings. The expense of the mausoleum burial is entirely consistent with any other form of disposing of the dead, and when the advanced features of this method are taken into consideration it is in fact very much cheaper. There are no taxes, no assessments, one paid for there is no further cost. From the sale of each compartment there is set aside a certain sum which goes into a fund for maintenance. This sum is ample to provide an income sufficient to cover the expenses of proper care and guardianship and is placed in the hands of the commissioners of the city, should occasion arise for removing the remains of an individual or family from the mausoleum to another city the compartments may be sold and transferred as other real estate.

BUT FEW PASS THE TEST FOR THE NAVY

The qualification required by the United States government to become an enlisted man in the navy are such that those who have passed the examinations and are now in the employ of Uncle Sam must be a superior lot. According to instructions sent to Electrician C. L. Wood in charge of the local naval recruiting station, a candidate is not accepted if he is bald-headed or has corns or bunions. According to Wood, who has had much experience as a recruiting officer, only one out of ten applicants is able to meet the physical requirements. The local branch office has been open two days and during that time the recruiting officer has had six applicants, but they were not eligible because of physical defects. This office is under the supervision of Lieutenant S. W. Calk of Salt Lake and applicants are sent to his office after passing a preliminary examination in the Ogden office. If the applicants are accepted, they are sent either to the Mare Island navy yard or are assigned to service on a training ship in Puget sound.

CITIZENSHIP IS DENIED TO TWO

In Judge Howell's division of the district court this morning, the applications of Peter Nex Boodrookas of Greece, and Alfonso Frank Roberto of Italy, James McCullough of Ireland, Miriam Van De Graaf, Jr. of Holland, Franz Gottlieb Albert Behling of Germany and Joseph Szyman Younes for citizenship papers were taken under consideration and witnesses examined touching their qualifications. Boodrookas' application was denied, owing to ignorance of American institutions; Roberto was admitted to citizenship, McCullough was told to wait awhile and, in the meantime, study the constitution of this country; Van De Graaf was considered worthy the title of citizen of the United States. The hearing of Behling was continued. Younes' petition was granted.

Forester oGoes to Zion.—District Forester E. A. Sherman has gone to Salt Lake today to confer with Supervisor E. H. Clarke regarding forest affairs. Mr. Sherman will also meet with the city commissioners respecting measures that are to be taken to protect the Wasatch watershed in the vicinity of the state capital.

WILL BUILD TO SALT LAKE

Railroad Company Offer If Denver Will Pay Two-thirds of Tunnel

Denver, Colo., Nov. 19.—"If the city of Denver will pay two-thirds of the cost of driving a six-mile tunnel through the continental divide, the new branch of the Denver, Northwestern & Pacific railroad will meet the remainder of the obligation and extend the road to Salt Lake City, giving a 168 mile shorter route."

This was the proposition submitted by Newman Erb, representing controlling interests of the railroad, last night to 400 business men of Denver, including representatives of the city government.

Latest estimates place the cost at about \$2,000,000. It is probable that the proposition will be submitted to the Denver voters at a special election.

Mr. Erb stated that the railroad company would agree to pay the interest on the bonds, giving the city title to the tunnel and its approaches. Another condition was that the railroad company's one-third share of the cost should be considered payment on an option to purchase the tunnel and approaches any time after five years, for the cost to the city, as evidenced by the bonds outstanding.

DR. HIBBS HAS QUIT AT THE SPRINGS

Dr. A. P. Hibbs and wife have taken a cottage at 2223 Adams which will be their home during the winter. The doctor will resume his practice as an osteopath, having given up the lease of the Utah Hot Springs which he has held two and one-half years. Dr. Hibbs will be temporarily in charge of the Springs until a manager is selected by the Utah Hot Springs company.

CARD OF THANKS

We wish to thank all our friends and neighbors for their kindness during the illness and death of our dear mother and sister. We also thank the singers and speakers for their words of comfort at the funeral, and all kind friends sending the beautiful floral offerings. (Signed) THE CROSS FAMILY AND GEO. F. CAVE. MACK-RAMBEAU CO TO HEAD ORPHEUM BILL THIS WEEK

Willard Mack and Marjorie Rambeau will head the bill this week with two plays written by Mr. Mack and said to be the best one-act plays in vaudeville today—on Thursday night a one-act story of the underworld, "Kick In," and on Friday night a one-act story called "Play Cards," both by Mr. Mack. The Mack-Rambeau company have been booked for all of the Orpheum time, opening at Ogden, with Salt Lake to follow, giving Ogden people a chance to see both acts. On Saturday matinee Mr. Mack will play "Kick In" and Saturday night "Play Cards" will be given. Both Mr. Mack and Marjorie Rambeau are known to be great actors and this will be a treat not often seen in vaudeville. Six other big acts will complete the bill this week. Order your seats early and come and enjoy a good show at the Orpheum this week. (Advertisement)

BEET HARVEST PROGRESSING FAVORABLY

The dry, warm weather of the past few days has aided the sugar beet growers in the digging and hauling of beets and it is said by the farmers that a few days more of such weather will make it possible for them to get most of the crop out of the ground. The roads are becoming solid and not much trouble is encountered in hauling the beets to the factory and loading places along the railroads.

THIRTY MEN ON THE ECCLES BUILDING

The large cement mixer at the Eccles building is running full blast today and about 30 men and a number of teams are busy building the north wall of the basement of the proposed steel structure.

Much water is being encountered in the basement, due to seepage from the side walls and the heavy rains of recent date. Hauling from the pit is made difficult because of the deep mud.

It is anticipated that before the week is over the remodeling of the ground floor of the Broom hotel building at the corner of Twenty-fifth street and Washington avenue will be completed and that in the early part of December the three store rooms will be occupied.

MUSIC AT THE FUNERAL ON MONDAY

The musical program for Mrs. Jane S. Richards' funeral, tomorrow afternoon, will be under the direction of Professor Joseph Ballantyne and is as follows:

Double Quartette—Mertie Higley, Lillian Scott, Jed Ballantyne, Geo. Douglas, Walter Stevens, Helmer Anderson, Mary Jacobs, Rhea Stevens will sing, "The Lord My Pasture Shall Prepare," and "When First the Glorious Light of Truth," "O, My Father," "Maud Dee Porter," "Face to Face," Lillian Scott, "My Father Knows," Mertie Higley and Geo. Douglas, "Guiding Story," by F. Dewey Richards, Howard Ensing of Salt Lake.

MUNICIPAL COURT

Three suits were filed today in the civil division of the municipal court as follows:
Herbert D. Shivers, Inc. vs. LeRoy Armstrong; suit, \$28.25.
Mrs. Lula Harrison vs. Charles R. Farrell; suit, \$28.
E. C. Christenson vs. Dr. S. C. Doran; suit, \$18.

New York Money.
New York, Nov. 19.—Close—Prime mercantile paper 6 per cent.
Sterling exchange heavy with actual business in bankers' bills at \$4.80 50 for 60-day bills and at \$4.85 for demand.
Commercial bills, \$4.80 1-2.
Bar silver \$2 5-8c.
Mexican dollars, 48 3-4c.

The Season's Greatest Event In Women's, Misses' and Girl's Outer Apparel Begins Tomorrow. The Most Sensational Reduction In Prices We Ever Made

TAILORED SUITS

Choice of over 250 of Last & Thomas' regular, carefully chosen suits, marked at three prices, each representing a very remarkable value.

\$15, \$18.75 and \$22.50

This is another of Last & Thomas' dependable sales, wherein superior garments are offered much under real value. Remember our suits are made by reliable Tailoring Houses, under right sanitary conditions, of good serviceable materials, and are tailored to retain their original shape.

The styles are the latest keynote of fashion. It will be one of the most important Suit Sales of the season, and we can promise a **BONAFIDE SAVING** of \$5.00 to \$10.00 ON EVERY SUIT IN THIS BEAUTIFUL COLLECTION.

COATS YOU WILL NOT SEE EVERYWHERE—25 PER CENT OFF

Women's Coats of distinctive Fabrics, and individual styles, both three quarter and full lengths.

Included are Zibelines, Kerseys, Broadcloths, diagonals and Boucles in a wide variety of styles.

THANKSGIVING LINENS 25 PER CENT OFF

The response to this extreme concession has been so liberal throughout the entire week that we have decided to renew it. This 1-4 off reduction is taken from our regular conservative selling prices and is offered as an annual pre-Thanksgiving event.

LAST & THOMAS

ENDURANCE AND VALOR OF BULGARIANS SHOWN IN THEIR PURSUIT OF TURK; HUNGRY AND TIRED, PRESS ON WITHOUT FOOD OR REST

During the brief period of the Balkan war the Bulgarian soldiers have shown themselves to possess fighting qualities the like of which is rarely found in the soldiers of any nation. Poorly equipped with arms and without sufficient hospital facilities or food, they have fought the Turk with wonderful courage and skill. In a few days they drove the disorganized Moslems flying before them from the Bulgarian frontier to the very gates of Constantinople. Always they were without sufficient food. Though weary from long marches and hard fighting, they took little rest, but pressed on toward the Turkish capital.

Bulgarian cavalry advancing on Constantinople.

CANDIDATES FOR BOARD OF EDUCATION

Although it was thought that all members of the board of education, with the exception of M. S. Browning, would be candidates for re-election in the school board election, Dr. C. E. Coulter has not yet decided to run again. In an interview today he said that his friends had urged him to come out but he was still undecided and would not reach a decision for a day or so. All other members may be candidates for re-election.

Charles Zeimer is reported to be a candidate from the Fifth ward and Wade Johnson is being urged to enter the contest from the Fourth ward. R. B. Porter was called up over the telephone and he said that several friends had been after him, but he has not yet decided to be a candidate to represent the Third ward.

O. J. Stillwell is being urged to run in his ward.

'SCOOP' IS AN OGDEN BOY OF ABILITY

Many having been asking who is the cartoonist responsible for the funny pictures running in the Standard under the heading, "Scoop," the answer is the creation of an Ogden boy, Frank W. Hopkins, who was born here in 1884. He has been a

LARGE FORCE IS AT WORK ON PIPE LINE

A large force of men is at work today on the pipe line of the Utah Light & Railway company, between the mouth of Ogden canyon and the power dam. There is also a good working force at the reservoir, removing mud. It is said that the pipe line will be finished and the reservoir cleared within the next six weeks, at which time the water will be turned back into the pipe and the power plant placed in operation.
